

WORKFLOW OVERVIEW

Twelve screens, one connected delivery record.

The main path moves one order from replenishment to receipt. Exception branches remain visible and return to the same order lifecycle.

Deferral branch

From the confirmed queue, Dispatch records a reason and impact, then Store sees the consequence.

Loading branch

A missing, damaged, or mismatched shipment pauses until the loader records a resolution.

Delivery branch

A failed stop stays outstanding for a return visit and never counts as a completed delivery.

Your inventory
Order in full cartons. Adjust any suggestion.

+ Use recommended quantities

Search product or SKU

All stock

Product	On hand	Stock health	Order quantity
Fresh milk - chilled 1 L - 12 packs / carton	8 ctn	Low stock ~2 days cover	Suggested 12 - 12 +
Fresh produce crate Mixed produce - 1 crate / carton	5 ctn	Low stock ~2 days cover	Suggested 10 - 10 +
Dry grocery essentials 24 packs / carton	14 ctn	Reorder soon ~4 days cover	Suggested 8 - 8 +
Household care pack 12 packs / carton	23 ctn	Healthy 7+ days cover	Suggested 6 - 6 +
Bottled water 1.5 L - 6 bottles / carton	17 ctn	Healthy 7+ days cover	Suggested 4 - 4 +

5 of 5 products

Available at Peliyagoda

Why these quantities?
Suggestions cover around 7 days of demand, based on recent sales, current stock and cartons already on order. Adjust for promotions or busier days.
Demand and availability are simulated for this demo.

Review quantities before you place your order.
Clear quantities

Inventory and a full-carton draft for OUT006.

Store manager | Order replenishment

Purpose

Turn stock context into a confirmed next-day replenishment request.

Primary action

Use or adjust recommended cartons, review the order, then place it.

Important information

On hand, stock health, days of cover, suggestions, weight, window, cutoff, and depot.

Rationale

Stock health, full-carton suggestions and the 16:00 cutoff help a counter manager choose quantities quickly without a separate spreadsheet.

Store manager | Order tracking & ETA

Purpose

Give the outlet a dependable view of what Dispatch has planned.

Primary action

Track the order and open details when more context is needed.

Important information

Lifecycle, expected arrival, delivery window, route, vehicle, driver, and exception state.

Rationale

Order status, calculated arrival, delivery window and vehicle help the outlet prepare staff and space for the expected handoff.

Amal Perera · Delivery partner

View receipt →

Driver POD is visible before the Store manager accepts the stock.

Store manager | Receipt check

Purpose

Separate driver delivery from the Store manager's confirmation of what arrived.

Primary action

Confirm receipt after checking cartons, or report an issue.

Important information

Delivered cartons, recipient, time, POD state, receipt confirmation, and issue record.

Rationale

Driver POD sits beside Confirm receipt and Report an issue, so the outlet can check cartons and record a discrepancy at the counter.

Dispatcher | Confirmed order queue

Purpose

Bring the orders that need a decision into one planning queue.

Primary action

Select an order, then assign it or record a deferral.

Important information

Outlet, window, cartons, weight, volume, temperature, access, last service, and repeat-skip risk.

Rationale

Orders, windows and service risk appear together so a planner at a large screen can choose the next assignment.

Road disruption advisory

Allow 15 extra minutes. Review the 08:00 Fresh windows before release.

Review route

A repeat skip requires both a reason and a concrete next action.

Dispatcher | Deferral decision

Purpose

Create a traceable decision when the current run cannot serve an order.

Primary action

Choose the reason, write the impact and next action, then record the deferral.

Important information

Order, outlet, window, days since service, previous skip, deferral reason, and protection for the next run.

Rationale

A reason and impact note make a skipped outlet visible and defensible at the planning desk when this run cannot serve it.

Relay | Dispatcher | Deferral decision

Check, count, then confirm.

Confirm carton quantities before moving to the next shipment.

Complete loading

The last delivery stop is presented first for loading.

Loader | Loading manifest

Purpose

Turn the released route into an unambiguous loading sequence.

Primary action

Check the current shipment and confirm it loaded before moving forward.

Important information

Vehicle, bay, driver, departure, temperature, stop number, order, products, cartons, and weight.

Rationale

Reverse stop order and carton counts guide fast loading on a shared warehouse tablet without burying the next shipment.

LOADER | SCREEN 09

Loading exception

The shipment pauses before it leaves the bay.

Loader | Loading exception

Purpose

Stop a short, damaged, or mismatched shipment and preserve the reason.

Primary action

Select what happened, add useful detail, save the issue, and later record a resolution.

Important information

Order, exception type, affected products or cartons, dock guidance, and resolution note.

Rationale

A blocked shipment and resolution note let dock staff stop a short or damaged load before it leaves the bay.
